

**FEDERALLY ENFORCEABLE STATE
OPERATING PERMIT (FESOP) Renewal
INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT
OFFICE OF AIR QUALITY
and
CITY OF INDIANAPOLIS
OFFICE OF ENVIRONMENTAL SERVICES**

**F.E. Harding Asphalt Co., Inc.
5145 East 96th Street
Indianapolis, Indiana 46240**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-8 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: F097-14085-00082	
Issued by: Original Signed by John B. Chavez John B. Chavez, Administrator Office of Environmental Services	Issuance Date: January 15, 2003 Expiration Date: January 15, 2008

SECTION A SOURCE SUMMARY

- A.1 General Information [326 IAC 2-8-3(b)]
- A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]
- A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-8-3(c)(3)(l)]
- A.4 FESOP Applicability [326 IAC 2-8-2]
- A.5 Prior Permits Superseded [326 IAC 2-1.1-9.5]

SECTION B GENERAL CONDITIONS

- B.1 Permit No Defense [IC 13]
- B.2 Definitions [326 IAC 2-8-1]
- B.3 Permit Term [326 IAC 2-7-5(2)] [326 IAC 2-1.1-9.5]
- B.4 Enforceability [326 IAC 2-8-6]
- B.5 Termination of Right to Operate [326 IAC 2-8-9][326 IAC 2-8-3 (h)]
- B.6 Severability [326 IAC 2-8-4(4)]
- B.7 Property Rights or Exclusive Privilege [326 IAC 2-8-4(5)(D)]
- B.8 Duty to Supplement and Provide Information [326 IAC 2-8-3(f)] [326 IAC 2-8-4(5)(E)]
- B.9 Compliance Order Issuance [326 IAC 2-8-5(b)]
- B.10 Compliance with Permit Conditions [326 IAC 2-8-4(5)(A)] [326 IAC 2-8-4(5)(B)]
- B.11 Certification [326 IAC 2-8-3(d)] [326 IAC 2-8-4(3)(C)(i)] [326 IAC 2-8-5(1)]
- B.12 Annual Compliance Certification [326 IAC 2-8-5(a)(1)]
- B.13 Preventive Maintenance Plan [326 IAC 1-6-3][326 IAC 2-8-4(9)][326 IAC 2-8-5(a)(1)]
- B.14 Emergency Provisions [326 IAC 2-8-12]
- B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]
- B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination
- B.17 Permit Renewal [326 IAC 2-8-3(h)]
- B.18 Permit Amendment or Revision [326 IAC 2-8-10][326 IAC 2-8-11.1]
- B.19 Operational Flexibility [326 IAC 2-8-15] [326 IAC 2-8-11.1]
- B.20 Permit Revision Requirement [326 IAC 2-8-11.1]
- B.21 Inspection and Entry [326 IAC 2-8-5(a)(2)] [I13-14-2-2]
- B.22 Transfer of Ownership or Operation [326 IAC 2-8-10]
- B.23 Annual Fee Payment [326 IAC 2-8-4(6)] [326 IAC 2-8-16] [326 IAC 2-1.1-7]

SECTION C SOURCE OPERATION CONDITIONS

Emission Limitations and Standards [326 IAC 2-8-4(1)]

- C.1 Particulate Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) pounds per hour [40 CFR 52 Subpart P][326 IAC 6-3-2]
- C.2 Overall Source Limit [326 IAC 2-8]
- C.3 Opacity [326 IAC 5-1]
- C.4 Open Burning [326 IAC 4-1][IC 13-17-9]
- C.5 Incineration [326 IAC 4-2] [326 IAC 9-1-2(3)]
- C.6 Fugitive Dust Emissions [326 IAC 6-4]
- C.7 Fugitive Particulate Matter Emission Limitations [326 IAC 6-5]
- C.8 Operation of Equipment [326 IAC 2-8-5(a)(4)]
- C.9 Stack Height [326 IAC 1-7]
- C.10 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

Testing Requirements [326 IAC 2-8-4(3)]

- C.11 Performance Testing [326 IAC 3-6]

Compliance Requirements [326 IAC 2-1.1-11]

C.12 Compliance Requirements [326 IAC 2-1.1-11]

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.13 Compliance Monitoring [326 IAC 2-8-4(3)] [326 IAC 2-8-5(a)(1)]

C.14 Monitoring Methods [326 IAC 3][40 CFR 60][40 CFR 63]

C.15 Pressure Gauge and Other Instrument Specifications[326 IAC 2-1.1-11]

Corrective Actions and Response Steps [326 IAC 2-8-4] [326 IAC 2-8-5]

C.16 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

C.17 Risk Management Plan [326 IAC 2-8-4] [40 CFR 68.215]

C.18 Compliance Response Plan - Preparation, Implementation, Records, and Reports
[326 IAC 2-8-4]

C.19 Actions Related to Noncompliance Demonstrated by a Stack Test

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

C.20 Emission Statement [326 IAC 2-6] [326 IAC 2-8-4(3)]

C.21 General Record Keeping Requirements [326 IAC 2-8-4(3)][326 IAC 2-8-5]

C.22 General Reporting Requirements [326 IAC 2-8-4(3)(C)] [326 IAC 2-1.1-11]

Stratospheric Ozone Protection

C.23 Compliance with 40 CFR 82 and 326 IAC 22-1

SECTION D.1 FACILITY OPERATION CONDITIONS

One (1) Drum Mixer (unit ID 2); and One (1) Hot Oil Heater

Emission Limitations and Standards [326 IAC 2-8-4(1)]

D.1.1 Particulate Matter (PM) [326 IAC 6-1-2]

D.1.2 Particulate Matter less than 10 microns (PM-10) [326 IAC 6-1-2][326 IAC 2-8-4]

D.1.3 Miscellaneous Operations: Asphalt Paving [326 IAC 8-5-2]

D.1.4 Preventive Maintenance Plan [326 IAC 2-8-4(9)] [326 IAC 1-6-3]

Testing Requirements [326 IAC 2-8-4 (3)]

D.1.5 Testing Requirement

Compliance Monitoring Requirements [326 IAC 2-8-5(a)(1)]

D.1.6 Parametric Monitoring

D.1.7 Baghouse Inspections

D.1.8 Broken or Failed Bag Detection

D.1.9 Visible Emissions Notations

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

D.1.10 Record Keeping Requirements

D.1.11 Reporting Requirements

Certification Form

Quarterly Report Form

Emergency Occurrence Form

Quarterly Deviation and Compliance Monitoring Form

Attachment A

SECTION A SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) and the City of Indianapolis Office of Environmental Services (OES). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-8-3(b)]

The Permittee owns and operates a stationary hot batch-mix asphalt plant with a maximum capacity of 180 tons per hour.

Authorized Individual:	President
Source Address:	5145 East 96 th Street, Indianapolis, Indiana 46240
Mailing Address:	10151 Hague Road, Indianapolis, Indiana, 46256
General Source Phone:	(317) 846-7401
SIC Code:	2951
Source Location Status:	Marion
County Status:	Attainment for all criteria pollutants
Source Status:	Federally Enforceable State Operating Permit (FESOP) Minor Source, under PSD Rules; Minor Source, Section 112 of Clean Air Act

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]

This stationary source consists of the following emission units and pollution control devices:

- (a) One (1) Asphalt Mixer (unit ID 1), 180 tons per hour maximum rated capacity, equipped with one (1) 80 million Btu per hour dryer burner (unit ID 2). The dryer burner will only combust natural gas. Particulate emissions are controlled by one (1) baghouse, blower rated at 46,000 cfm. The asphalt mixer was installed in 1969. The dryer burner was installed in 1989.

A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-8-3(c)(3)(I)]

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (a) Two (2) 22,000 gallon VOL Storage Tanks, maximum true vapor pressure less than 15.0 kPa. These tanks were installed in 1969;
- (b) One (1) Hot Oil Heater, 1.3 million Btu per hour maximum rated capacity. The Hot Oil Heater will only combust natural gas;
- (c) Petroleum fuel (excluding gasoline) dispensing facilities having storage capacities less than or equal to 10,500 gallons and dispensing less than or equal to 230,000 gallons per month;
- (d) Closed loop heating and cooling systems; and
- (e) Three (3) hot asphalt mix storage silos: 170 tons, 190 tons, and 200 tons capacity.

- (f) Vessels storing lubricating oils, hydraulic oils, machining oils, and machining fluids;
- (g) Vehicle travel on paved roads, unpaved roads, and parking lots;
- (h) Aggregate stockpiles;
- (i) Conveying, transferring, and transportation of aggregates by vehicles;
- (j) Loading and unloading of material.

A.4 FESOP Applicability [326 IAC 2-8-2]

This stationary source, otherwise required to have a Part 70 permit as described in 326 IAC 2-7-2(a), has applied to the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) and the City of Indianapolis Office of Environmental Services (OES) to renew a Federally Enforceable State Operating Permit (FESOP).

A.5 Prior Permit Superseded [326 IAC 2-1.1-9.5]

- (a) All terms and conditions of previous permits issued pursuant to permitting programs approved into the state implementation plan have been either
 - (1) incorporated as originally stated,
 - (2) revised, or
 - (3) deletedby this permit.
- (b) All previous registrations and permits are superseded by this permit.

SECTION B GENERAL CONDITIONS

B.1 Permit No Defense [IC 13]

Indiana statutes from IC 13 and rules from 326 IAC, quoted in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a FESOP under 326 IAC 2-8.

B.2 Definitions [326 IAC 2-8-1]

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2, and 326 IAC 2-7) shall prevail.

B.3 Permit Term [326 IAC 2-7-5(2)] [326 IAC 2-1.1-9.5]

This permit is issued for a fixed term of five (5) years from the issuance date of this permit, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date.

B.4 Enforceability [326 IAC 2-8-6]

- (a) Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM and OES, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.
- (b) Unless otherwise stated, all terms and conditions in this permit that are local requirements, including any provisions designed to limit the source's potential to emit, are enforceable by OES.

B.5 Termination of Right to Operate [326 IAC 2-8-9] [326 IAC 2-8-3(h)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-8-3(h) and 326 IAC 2-8-9.

B.6 Severability [326 IAC 2-8-4(4)]

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

B.7 Property Rights or Exclusive Privilege [326 IAC 2-8-4(5)(D)]

This permit does not convey any property rights of any sort, or any exclusive privilege.

B.8 Duty to Supplement and Provide Information [326 IAC 2-8-3(f)] [326 IAC 2-8-4(5)(E)] [326 IAC 2-8-5(a)(4)]

- (a) The Permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

The submittal by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall furnish to IDEM, OAQ, and OES within a reasonable time, any information that IDEM, OAQ, and/or OES may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1). Upon request, the Permittee shall also furnish to IDEM, OAQ and OES copies of records required to be kept by this permit.
- (c) For information furnished by the Permittee to IDEM, OAQ, the Permittee may include a claim of confidentiality in accordance with 326 IAC 17. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.9 Compliance Order Issuance [326 IAC 2-8-5(b)]

IDEM, OAQ and/or OES may issue a compliance order to this Permittee upon discovery that this permit is in nonconformance with an applicable requirement. The order may require immediate compliance or contain a schedule for expeditious compliance with the applicable requirement.

B.10 Compliance with Permit Conditions [326 IAC 2-8-4(5)(A)] [326 IAC 2-8-4(5)(B)]

- (a) The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit is grounds for:
 - (1) Enforcement action;
 - (2) Permit termination, revocation and reissuance, or modification; and
 - (3) Denial of a permit renewal application.
- (b) It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
- (c) An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in Section B, Emergency Provisions.

B.11 Certification [326 IAC 2-8-3(d)] [326 IAC 2-8-4(3)(C)(i)] [326 IAC 2-8-5(1)]

- (a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by an authorized individual of truth, accuracy, and completeness. This certification, shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) One (1) certification shall be included, using the attached Certification Form, with each

submittal requiring certification.

- (c) An authorized individual is defined at 326 IAC 2-1.1-1(1).

B.12 Annual Compliance Certification [326 IAC 2-8-5(a)(1)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. All certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted in letter form no later than April 15 of each year to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, and/or OES on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
- (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
 - (2) The compliance status;
 - (3) Whether compliance was continuous or intermittent;
 - (4) The methods used for determining the compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-8-4(3); and
 - (5) Such other facts as specified in Sections D of this permit, IDEM, OAQ, and/or OES may require to determine the compliance status of the source.

The notification which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

B.13 Preventive Maintenance Plan [326 IAC 1-6-3] [326 IAC 2-8-4(9)] [326 IAC 2-8-5(a)(1)]

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall maintain and implement Preventive Maintenance Plans (PMPs), including the following information on each facility:
- (1) Identification of the individual(s) responsible for inspecting, maintaining, and

repairing emission control devices;

- (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
- (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

If due to circumstances beyond the Permittee's control, the PMPs cannot be prepared and maintained within the above time frame, the Permittee may extend the date an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

The PMP extension notification does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall implement the PMPs as necessary to ensure that failure to implement a PMP does not cause or contribute to a violation of any limitation on emissions or potential to emit.
- (c) A copy of the PMPs shall be submitted to IDEM, OAQ and/or OES upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ and/or OES. IDEM, OAQ and/or OES may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or contributes to any violation. The PMP does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (d) Records of preventive maintenance shall be retained for a period of at least five (5) years. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner or OES makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner and/or OES within a reasonable time.

B.14 Emergency Provisions [326 IAC 2-8-12]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation, except as provided in 326 IAC 2-8-12.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describes the

following:

- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
- (2) The permitted facility was at the time being properly operated;
- (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
- (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ or OES, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

IDEM, OAQ

Telephone No.: 1-800-451-6027 (ask for Office of Air Quality, Compliance Section)

or,

Telephone No.: 317-233-5674 (ask for Compliance Section)

Facsimile No.: 317-233-5967

OES

Telephone No.: 317/327-2234

Facsimile No.: 317/327-2274

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management

Compliance Branch, Office of Air Quality

100 North Senate Avenue, P.O. Box 6015

Indianapolis, Indiana 46206-6015

and

City of Indianapolis

Office of Environmental Services

Air Quality Management Section

2700 South Belmont Avenue

Indianapolis Indiana 46221-2097

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-8-4(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) IDEM, OAQ and/or OES may require that the Preventive Maintenance Plans required under 326 IAC 2-8-3(c)(6) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ or OES by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-8 and any other applicable rules.
- (g) Operations may continue during an emergency only if the following conditions are met:
 - (1) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
 - (2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:
 - (A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and
 - (B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw material of substantial economic value.

Any operations shall continue no longer than the minimum time required to prevent the situations identified in (g)(2)(B) of this condition.
- (h) The Permittee shall include all emergencies in the Quarterly Deviation and Compliance Monitoring Report.

B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provision), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality (Data Compliance Section)
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. A deviation required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and does not need to be included in this report.

The Quarterly Deviation and Compliance Monitoring Report does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit.

B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination

[326 IAC 2-8-4(5)(C)] [326 IAC 2-8-7(a)] [326 IAC 2-8-8]

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a FESOP modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-8-4(5)(C)] The notification by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ or OES determines any of the following:
 - (1) That this permit contains a material mistake.
 - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
 - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-8-8(a)]
- (c) Proceedings by IDEM, OAQ and/or OES to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-8-8(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-8-8(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ or OES at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ or OES may provide a shorter time period in the case of an emergency. [326 IAC 2-8-8(c)]

B.17 Permit Renewal [326 IAC 2-8-3(h)]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ and/or OES and shall include the information specified in 326 IAC 2-8-3. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does

require the certification by the “authorized individual” as defined by 326 IAC 2-1.1-1(1).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015

2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

(b) Timely Submittal of Permit Renewal [326 IAC 2-8-3]

(1) A timely renewal application is one that is:

- (A) Submitted at least nine (9) months prior to the date of the expiration of this permit; and
- (B) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ and/or OES on or before the date it is due.

(2) If IDEM, OAQ and/or OES upon receiving a timely and complete permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect until the renewal permit has been issued or denied.

(c) Right to Operate After Application for Renewal [326 IAC 2-8-9]

If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-8 until IDEM, OAQ and/or OES takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ and OES any additional information identified as needed to process the application.

B.18 Permit Amendment or Revision [326 IAC 2-8-10] [326 IAC 2-8-11.1]

(a) Permit amendments and revisions are governed by the requirements of 326 IAC 2-8-10 or 326 IAC 2-8-11.1 whenever the Permittee seeks to amend or modify this permit.

(b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

Any such application shall be certified by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (c) The Permittee may implement the administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-10(b)(3)]

B.19 Operational Flexibility [326 IAC 2-8-15] [326 IAC 2-8-11.1]

- (a) The Permittee may make any change or changes at this source that are described in 326 IAC 2-8-15(b) through (d), without prior permit revision, if each of the following conditions is met:

- (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
- (2) Any approval required by 326 IAC 2-8-11.1 has been obtained;
- (3) The changes do not result in emissions which exceed the emissions allowable under this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
- (4) The Permittee notifies the:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and

- (5) The Permittee maintains records on-site which document, on a rolling five (5) year basis, all such changes and emissions trading that are subject to 326 IAC 2-8-15(b) through (d) and makes such records available, upon reasonable request, to public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ and OES in the notices specified in 326 IAC 2-8-15(b)(2), (c)(1), and (d).

- (b) Emission Trades [326 IAC 2-8-15(c)]
The Permittee may trade increases and decreases in emissions in the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-8-15(c).
- (c) Alternative Operating Scenarios [326 IAC 2-8-15(d)]
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-8-4(7). No prior notification of IDEM, OAQ or U.S. EPA is required.

B.20 Permit Revision Requirement [326 IAC 2-8-11.1]

A modification, construction, or reconstruction is governed by the requirements of 326 IAC 2 and 326 IAC 2-8-11.1.

B.21 Inspection and Entry [326 IAC 2-8-5(a)(2)] [IC 13-14-2-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ and/or OES, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a FESOP source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
- (c) Inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) Sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) Utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

B.22 Transfer of Ownership or Operational Control [326 IAC 2-8-10]

- (a) The Permittee must comply with the requirements of 326 IAC 2-8-10 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

The application which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-10(b)(3)]

B.23 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-8-4(6)] [326 IAC 2-8-16] [326 IAC 2-1.1-7]

- (a) The Permittee shall pay annual fees to IDEM, OAQ, within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ the applicable fee is due April 1 of each year.
- (b) Failure to pay may result in administrative enforcement action, or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-4320 (ask for O AQ, I/M & Billing Section), to determine the appropriate permit fee.

SECTION C SOURCE OPERATION CONDITIONS

Entire Source

Emissions Limitations and Standards [326 IAC 2-8-4(1)]

C.1 Particulate Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) pounds per hour [40 CFR 52 Subpart P][326 IAC 6-3-2]

- (a) Pursuant to 40 CFR 52 Subpart P, the allowable particulate matter emissions rate from any process not already regulated by 326 IAC 6-1 or any New Source Performance Standard, and which has a maximum process weight rate less than 100 pounds per hour shall not exceed 0.551 pounds per hour.
- (b) Pursuant to 326 IAC 6-3-2(e)(2), the allowable particulate emissions rate from any process not exempt under 326 IAC 6-3-1(b) or (c) which has a maximum process weight rate less than 100 pounds per hour and the methods in 326 IAC 6-3-2(b) through (d) do not apply shall not exceed 0.551 pounds per hour.

C.2 Overall Source Limit [326 IAC 2-8]

The purpose of this permit is to limit this source's potential to emit to less than major source levels for the purpose of Section 502(a) of the Clean Air Act.

- (a) Pursuant to 326 IAC 2-8:
 - (1) The potential to emit any regulated pollutant, except particulate matter (PM), from the entire source shall be limited to less than one-hundred (100) tons per twelve (12) consecutive month period. This limitation shall also make the requirements of 326 IAC 2-2 (Prevention of Significant Deterioration (PSD)) not applicable.
 - (2) The potential to emit any individual hazardous air pollutant (HAP) from the entire source shall be limited to less than ten (10) tons per twelve (12) consecutive month period; and
 - (3) The potential to emit any combination of HAPs from the entire source shall be limited to less than twenty-five (25) tons per twelve (12) consecutive month period.
- (b) This condition shall include all emission points at this source including those that are insignificant as defined in 326 IAC 2-7-1(21). The source shall be allowed to add insignificant activities not already listed in this permit, provided that the source's potential to emit does not exceed the above specified limits.
- (c) Section D of this permit contains independently enforceable provisions to satisfy this requirement.

C.3 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of thirty percent (30%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15)

minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.4 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1.

C.5 Incineration [326 IAC 4-2] [326 IAC 9-1-2(3)]

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and in 326 IAC 9-1-2.

C.6 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

C.7 Fugitive Particulate Matter Emission Limitations [326 IAC 6-5]

Pursuant to 326 IAC 6-5 (Fugitive Particulate Matter Emission Limitations), fugitive particulate matter emissions shall be controlled according to the plan submitted on January 17, 1997. The plan is included as Attachment A.

C.8 Operation of Equipment [326 IAC 2-8-5(a)(4)]

Except as otherwise provided by statute, rule or in this permit, all air pollution control equipment listed in this permit and used to comply with an applicable requirement shall be operated at all times that the emission units vented to the control equipment are in operation.

C.9 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25) tons per year or more of particulate matter or sulfur dioxide is emitted.

C.10 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

(a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.

(b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:

(1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or

(2) If there is a change in the following:

(A) Asbestos removal or demolition start date;

(B) Removal or demolition contractor; or

(C) Waste disposal site.

- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).
- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Asbestos Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (e) Procedures for Asbestos Emission Control
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-1 emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) Indiana Accredited Asbestos Inspector
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement that the inspector be accredited is federally enforceable.

Testing Requirements [326 IAC 2-8-4(3)]

C.11 Performance Testing [326 IAC 3-6]

- (a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM, OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality (Compliance Data Section)
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ and/or OES not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ, if the source submits to IDEM, OAQ, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

Compliance Requirements [326 IAC 2-1.1-11]

C.12 Compliance Requirements [326 IAC 2-1.1-11]

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements by issuing an order under 326 IAC 2-1.1-11. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.13 Compliance Monitoring [326 IAC 2-8-4(3)] [326 IAC 2-8-5(a)(1)]

Unless otherwise specified in this permit, all monitoring and record keeping requirements not already legally required shall be implemented upon issuance of this permit. If required by Section D, the Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment.

Unless otherwise specified in the approval for the new emissions unit, compliance monitoring for new emission units or emission units added through a permit revision shall be implemented when operation begins.

C.14 Monitoring Methods [326 IAC 3] [40 CFR 60] [40 CFR 63]

Any monitoring or testing performed required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60 Appendix B, 40 CFR 63 or other approved methods as specified in this permit.

C.15 Pressure Gauge and Other Instrument Specifications [326 IAC 2-1.1-11] [326 IAC 2-8-4(3)]
[326 IAC 2-8-5(1)]

- (a) Whenever a condition in this permit requires the measurement of pressure drop across any part of the unit or its control device, the gauge employed shall have a scale such that the expected normal reading shall be no less than twenty percent (20%) of full scale and be accurate within plus or minus two percent ($\pm 2\%$) of full scale reading.
- (b) Whenever a condition in this permit requires the measurement of a pressure drop, the instrument employed shall have a scale such that the expected normal reading shall be no less than twenty percent (20%) of full scale and be accurate within plus or minus two percent ($\pm 2\%$) of full scale reading.
- (c) The Preventative Maintenance Plan for the pH meter shall include calibration using known standards. The frequency of calibration shall be adjusted such that the typical error found at calibration is less than one pH point.
- (d) The Permittee may request the IDEM, OAQ approve the use of a pressure gauge or other instrument that does not meet the above specifications provided the Permittee can demonstrate an alternative pressure gauge or other instrument specification will adequately ensure compliance with permit conditions requiring the measurement of pressure drop or other parameters.

Corrective Actions and Response Steps [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.16 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

- (a) The Permittee prepared and submitted written emergency reduction plans (ERPs) consistent with safe operating procedures on September 20, 1988.
- (b) Upon direct notification by IDEM, OAQ and/or OES that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level. [326 IAC 1-5-3]

C.17 Risk Management Plan [326 IAC 2-8-4] [40 CFR 68.215]

If a regulated substance, subject to 40 CFR 68, is present at a source in more than a threshold quantity, 40 CFR 68 is an applicable requirement and the Permittee shall submit:

- (a) A compliance schedule for meeting the requirements of 40 CFR 68; or
- (b) As a part of the annual compliance certification submitted under 326 IAC 2-7-6(5), a certification statement that the source is in compliance with all the requirements of 40 CFR 68, including the registration and submission of a Risk Management Plan (RMP); and

All documents submitted pursuant to this condition shall include the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

C.18 Compliance Response Plan - Preparation, Implementation, Records and Reports [326 IAC 2-7-5]
[326 IAC 2-7-6]

- (a) The Permittee is required to prepare a Compliance Response Plan (CRP) for each compliance monitoring condition of this permit. A CRP shall be submitted to IDEM, OAQ, and OES upon request. The CRP shall be prepared within ninety (90) days after issuance of this permit by the Permittee, supplemented from time to time by the Permittee, maintained on site, and comprised of:

- (1) Reasonable response steps that may be implemented in the event that a response step is needed pursuant to the requirements of Section D of this permit; and an expected time frame for taking reasonable response steps.
 - (2) If, at any time, the Permittee takes reasonable response steps that are not set forth in the Permittee's current Compliance Response Plan and the Permittee documents such response in accordance with subsection (e) below, the Permittee shall amend its Compliance Response Plan to include such response steps taken.
- (b) For each compliance monitoring condition of this permit, reasonable response steps shall be taken when indicated by the provisions of that compliance monitoring condition as follows:
 - (1) Reasonable response steps shall be taken as set forth in the Permittee's current Compliance Response Plan; or
 - (2) If none of the reasonable response steps listed in the Compliance Response Plan is applicable or responsive to the excursion, the Permittee shall devise and implement additional response steps as expeditiously as practical. Taking such additional response steps shall not be considered a deviation from this permit so long as the Permittee documents such response steps in accordance with this condition.
 - (3) If the Permittee determines that additional response steps would necessitate that the emissions unit or control device be shut down, the IDEM, OAQ shall be promptly notified of the expected date of the shut down, the status of the applicable compliance monitoring parameter with respect to normal, and the results of the actions taken up to the time of notification.
 - (4) Failure to take reasonable response steps shall constitute a violation of the permit.
- (c) The Permittee is not required to take any further response steps for any of the following reasons:
 - (1) A false reading occurs due to the malfunction of the monitoring equipment and prompt action was taken to correct the monitoring equipment.
 - (2) The Permittee has determined that the compliance monitoring parameters established in the permit conditions are technically inappropriate, has previously submitted a request for an administrative amendment to the permit, and such request has not been denied.
 - (3) An automatic measurement was taken when the process was not operating.
 - (4) The process has already returned or is returning to operating within "normal" parameters and no response steps are required.
- (d) When implementing reasonable steps in response to a compliance monitoring condition, if the Permittee determines that an exceedance of an emission limitation has occurred, the Permittee shall report such deviations pursuant to Section B-Deviations from Permit Requirements and Conditions.

- (e) The Permittee shall record all instances when response steps are taken. In the event of an emergency, the provisions of 326 IAC 2-8-12 (Emergency Provisions) requiring prompt corrective action to mitigate emissions shall prevail.
- (f) Except as otherwise provided by a rule or provided specifically in Section D, all monitoring as required in Section D shall be performed when the emission unit is operating, except for time necessary to perform quality assurance and maintenance activities.

**C.19 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-8-4]
[326 IAC 2-8-5]**

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.
- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one-hundred and twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The documents submitted pursuant to this condition do require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

C.20 Emission Statement [326 IAC 2-6] [326 IAC 2-8-4(3)]

- (a) The Permittee shall submit an emission statement certified pursuant to the requirements of 326 IAC 2-6. This statement must be received in accordance with the compliance schedule specified in 326 IAC 2-6-3 and must comply with the minimum requirements specified in 326 IAC 2-6-4. The submittal should cover the period defined in 326 IAC 2-6-2(8). The statement must be submitted to:

Indiana Department of Environmental Management
Technical Support and Modeling Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

The emission statement does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The emission statement required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ and/or OES on or before the date it is due.

C.21 General Record Keeping Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-5]

- (a) Records of all required data, reports and support information shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner or OES makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner or OES within a reasonable time.
- (b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

C.22 General Reporting Requirements [326 IAC 2-8-4(3)(C)] [326 IAC 2-1.1-11]

- (a) The source shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported. This report shall be submitted within thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include the certification by the "authorized individual" as defined by 326 IAC2-1.1-1(1).
- (b) The report required in (a) of this condition and reports required by conditions in Section D of this permit shall be submitted to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality (Compliance Data Section)
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

City of Indianapolis
Office of Environmental Services
Air Quality Management Section
2700 South Belmont Avenue
Indianapolis Indiana 46221-2097

- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ and/or OES on or before the date it is due.
- (d) Unless otherwise specified in this permit, all reports required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. All reports do require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (e) Reporting periods are based on calendar years.

Stratospheric Ozone Protection

C.23 Compliance with 40 CFR 82 and 326 IAC 22-1

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with the standards for recycling and emissions reduction:

- (a) Persons opening appliances for maintenance, service, repair or disposal must comply with the required practices pursuant to 40 CFR 82.156
- (b) Equipment used during the maintenance, service, repair or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 CFR 82.158.
- (c) Persons performing maintenance, service, repair or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

SECTION D.1 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-8-4(10)]:

- (a) One (1) Asphalt Mixer (unit ID 1), 180 tons per hour maximum rated capacity, equipped with one (1) 80 million Btu per hour dryer burner (unit ID 2). The dryer burner will only combust natural gas. Particulate emissions are controlled by one (1) baghouse, blower rated at 46,000 cfm. The asphalt mixer was installed in 1969. The dryer burner was installed in 1989.
(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-8-4(1)]

D.1.1 Particulate Matter (PM) [326 IAC 6-1-2]

Pursuant to this 326 IAC 6-1-2(c)(1), particulate matter emissions from the dryer burner shall not exceed 0.10 grains per dry standard cubic foot (gr/dcsf). The baghouse shall be in operation at all times the dryer burner is in operation, in order to comply with this limit.

D.1.2 Particulate Matter less than 10 microns (PM-10) [326 IAC 6-1-2][326 IAC 2-8-4]

- (a) The total asphalt production for this plant shall be limited to 1,053,438 tons per twelve (12) consecutive month period with compliance determined at the end of each month. This production limit is the equivalent of ninety-nine (99.0) tons of PM-10 source wide per twelve consecutive month period.
- (b) PM-10 emissions from combined process equipment and dryer burner operations shall be limited to two tenths (0.2) pounds of PM-10 per ton of asphalt produced (lbs/ton). Due to the potential to emit limitations, Part 70 rule (326 IAC 2-7) is not applicable.

D.1.3 Miscellaneous Operations: Asphalt Paving [326 IAC 8-5-2]

The source does not produce cold mix cutback asphalt, therefore, the requirements of 326 IAC 8-5-2 do not apply. Any change or modification that would allow the production of cold mix cutback asphalt will require prior approval by OAQ and OES.

D.1.4 Preventive Maintenance Plan [326 IAC 2-8-4(9)] [326 IAC 1-6-3]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for this facility and its control device.

Testing Requirements [326 IAC 2-8-4(3)]

D.1.5 Testing Requirement

By May 2005, the Permittee shall perform a stack test approved by OES/AQM and IDEM/OAQ to demonstrate compliance with D.1.1 and D.1.2. Stack testing shall include testing for PM and PM10 (filterable and condensable). The stack test methods shall be in accordance with the provisions of 326 IAC 3-2.1 (Source Sampling Procedures).

Compliance Monitoring Requirements [326 IAC 2-8-5(a)(1)]

D.1.6 Parametric Monitoring

The Permittee shall record the total static pressure drop across the baghouse used in conjunction with the dryer burner, at least once per shift when the dryer burner is in operation when venting to the atmosphere. When for any one reading, the pressure drop across the baghouse is outside the normal range of 2.0 and 8.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps in accordance with Section C- Compliance Response Plan - Preparation, Implementation, Records and Reports. A pressure reading that is

outside the above mentioned range is not a deviation from this permit. Failure to take response steps in accordance with Section C - Compliance Response Plan - Failure to Take Response Steps, shall be considered a violation of this permit.

The instrument used for determining the pressure shall comply with Section C - Pressure Gauge and Other Instruments Specifications, of this permit, shall be subject to approval by IDEM, OAQ, and OES and shall be calibrated at least once every six (6) months.

D.1.7 Baghouse Inspections

An inspection shall be performed each calendar quarter of all bags controlling the dryer burner when venting to the atmosphere. A baghouse inspection shall be performed within three months of redirecting vents to the atmosphere and every three months thereafter. Inspections are optional when venting to the indoors. All defective bags shall be replaced.

D.1.8 Broken or Failed Bag Detection

In the event that bag failure has been observed:

- (a) For multi-compartment units, the affected compartments will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if there are no visible emissions or if the event qualifies as an emergency and the Permittee satisfies the emergency provisions of this permit (Section B- Emergency Provisions). Within eight (8) business hours of the determination of failure, response steps according to the timetable described in the Compliance Response Plan shall be initiated. For any failure with corresponding response steps and timetable not described in the Compliance Response Plan, response steps shall be devised within eight (8) business hours of discovery of the failure and shall include a timetable for completion. Failure to take response steps in accordance with Section C - Compliance Response Plan -Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit.
- (b) For single compartment baghouses, failed units and the associated process will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

D.1.9 Visible Emissions Notations

- (a) Visible emission notations of the baghouse stack exhaust, conveyors, and transfer points shall be performed once per shift during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed. Failure to take response steps in accordance with Section C- Compliance Response Plan - Preparation, Implementation, Records and Reports, shall be considered a violation of this permit.

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

D.1.10 Record Keeping Requirements

- (a) To document compliance with Condition D.1.2, the Permittee shall maintain records in accordance with (1) through (3) below. Records maintained for (1) through (3) shall be taken as stated below and shall be complete and sufficient to establish compliance with the PM-10 emission limits established in Condition D.1.2.
 - (1) A log of the dates of operation;
 - (2) The total amount of asphalt produced each month; and
 - (3) The amount of natural gas used each month.
- (b) To document compliance with Condition D.1.7, the Permittee shall maintain records of the total static pressure drop across the baghouse used in conjunction with the dryer burner, at least once per shift when the dryer burner is in operation when venting to the atmosphere.
- (c) To document compliance with Condition D.1.8, the Permittee shall maintain quarterly records of the inspections performed on all bags controlling the dryer burner when venting to the atmosphere.
- (d) To document compliance with Condition D.1.10, the Permittee shall maintain records of visible emission notations of the stack exhaust once per shift.
- (e) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.1.11 Reporting Requirements

A quarterly summary of the information to document compliance with Condition D.1.2 shall be submitted to the addresses listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Addendum to the
Technical Support Document for Federally Enforceable State Operating Permit
(FESOP) Renewal

Source Background and Description

Source Name:	F.E. Harding Asphalt Co., Inc.
Source Location:	5145 East 96th Street, Indianapolis, IN, 46240
County:	Marion
SIC Code:	2951
Operation Permit No.:	F097-14085-00082
Permit Reviewer:	N. Olsen

On November 27, 2002, the Office of Environmental Services (OES) had a notice published in the Indianapolis Star Newspaper, Indianapolis, Indiana, stating that F.E. Harding Asphalt Co., Inc. had applied for a Federally Enforceable State Operating Permit (FESOP) Renewal to operate a hot mix asphalt plant. The notice also stated that OES and Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) proposed to issue a permit for this operation and provided information on how the public could review the proposed permit and other documentation. Finally, the notice informed interested parties that there was a period of thirty (30) days to provide comments on whether or not this permit should be issued as proposed.

The following changes, to the draft FESOP Renewal Permit, will be made. The TSD will remain as it originally appeared when published. These changes have no effect on the limited potential to emit (PTE) for this source. OES and OAQ prefers that the Technical Support Document reflect the permit that was on public notice. Changes to the permit or technical support material that occur after the permit has been published are documented in this Addendum to the Technical Support Document. This accomplishes the desired result of ensuring that these types of concerns are documented and part of the record regarding this permit decision.

Upon further review, the OES has decided to make the following revisions to the permit (bolded language has been added, the language with a line through it has been deleted). The Table Of Contents has been modified to reflect these changes, if necessary.

Change 1:

In response to a comment received from IDEM, a change has been made to Condition D.1.3 Particulate Matter (PM) [326 IAC 6-1-2]. This condition should not have included reference to PM-10 because 326 IAC 6-1-2 is applicable only to PM. Language regarding PM-10 has been removed. This change does not affect the limited potential to emit. The condition has been updated to include the correction:

D.1.1 Particulate Matter (PM) [326 IAC 6-1-2]

Pursuant to this 326 IAC 6-1-2(c)(1), particulate matter emissions from the dryer burner shall not exceed 0.10 grains per dry standard cubic foot (gr/dscf). ~~This is equivalent to PM-10 emissions of twenty-nine and three tenths (29.3) pounds per hour (lb/hr).~~ The baghouse shall be in operation at all times the dryer burner is in operation, in order to comply with this limit.

Source Comments:

Comment 1 (received by mail):

The mailing address (Section A.1 General Information) should be changed to 10151 Hague Road, Indianapolis, Indiana, 46256

Response 1:

The mailing address was incorrectly recorded in Section A of the permit. This has been corrected. This condition has also been updated to reflect changes from the most recent FESOP Renewal model update. The authorized individual should have been noted as a title instead of a name and the general source phone number is now included. The report forms have been updated to reflect this change. The condition has been changed as follows:

A.1 General Information [326 IAC 2-8-3(b)]

The Permittee owns and operates a stationary hot batch-mix asphalt plant with a maximum capacity of 180 tons per hour.

Authorized Individual:	Fred E. Harding President
Source Address:	5145 East 96 th Street, Indianapolis, Indiana 46240
Mailing Address:	P.O. Box 509206, Goshen, Indiana 46250 10151 Hague Road, Indianapolis, Indiana, 46256
General Source Phone:	(317) 846-7401
SIC Code:	2951
Source Location Status:	Marion
County Status:	Attainment for all criteria pollutants
Source Status:	Federally Enforceable State Operating Permit (FESOP) Minor Source, under PSD Rules; Minor Source, Section 112 of Clean Air Act

Comment 2 (received by mail):

Section B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)] makes reference to the attached Quarterly Deviation and Compliance Monitoring Report. This report is missing from the permit and should be added.

Response 2:

This report was inadvertently not attached to the permit. This has been corrected. It has been included as pages 36 and 37 of 37. The table of contents has been updated to reflect this change.

Comment 3 (received by mail):

Section D.1.4 Volatile Organic Compounds (VOC) [326 IAC 2-8-4] contains limits for VOC solvent that is contained in liquid binders used in the production of cold mix asphalt. Harding Asphalt is strictly a hot mix asphalt batch plant and never plans to produce cold mix asphalt. Furthermore, the plant is not capable of producing cold mix asphalt. The plant would need several modifications including a new pump and lines to handle the cold mix process. We believe that this section should be removed from the permit along with D.1.11 (b) under Record Keeping Requirements and the FESOP Quarterly Report on page 33 or 35.

Response 3:

Conditions D.1.4 and the Quarterly Report shall be deleted as the Permittee does not produce cold mix cutback asphalt. Conditions D.1.3, D.1.10, and D.1.11 shall be modified as follows. The table of contents and page numbering has been updated to reflect the following changes to the Renewal:

D.1.3 Miscellaneous Operations: Asphalt Paving [326 IAC 8-5-2]

~~Pursuant to 326 IAC 8-5-2, no person shall cause or allow the use of cutback asphalt or asphalt~~

emulsion containing more than seven (7) percent oil distillate by volume of emulsion of any paving application except:

- ~~_____ (a) Penetrating prime coating;~~
- ~~_____ (b) Stockpile storage; and~~
- ~~_____ (c) Application during the months of November, December, January, February, and March.~~

The source does not produce cold mix cutback asphalt, therefore, the requirements of 326 IAC 8-5-2 do not apply. Any change or modification that would allow the production of cold mix cutback asphalt will require prior approval by OAQ and OES.

~~D.1.4 Volatile Organic Compounds (VOC) [326 IAC 2-8-4]~~

- ~~_____ (a) Pursuant to 326 IAC 2-8-4, the VOC solvent used as diluent in the liquid binder used in cold mix asphalt production from the plant shall be limited such that no more than ninety-seven and nine tenths (97.9) tons of VOC emissions emitted per twelve (12) consecutive months with compliance determined at the end of each month. This shall be achieved by limiting the total VOC solvent of any one selected binder to not exceed the stated limit in (c) for that binder during the last twelve (12) months. When more than one binder is used, the formula in (c)(6) must be applied so that the total source wide VOC emitted does not exceed ninety-nine (99.0) tons per twelve (12) consecutive month period.~~
- ~~_____ (b) Liquid binders used in the production of cold mix asphalt shall be defined as follows:~~
 - ~~_____ (1) Cut back asphalt rapid cure, containing a maximum of 25.3% of the liquid binder by weight of VOC solvent and 95% by weight of VOC solvent evaporating.~~
 - ~~_____ (2) Cut back asphalt medium cure, containing a maximum of 28.6% of the liquid binder by weight of VOC solvent and 70% by weight of VOC solvent evaporating.~~
 - ~~_____ (3) Cut back asphalt slow cure, containing a maximum of 20% of the liquid binder by weight of VOC solvent and 25% by weight of VOC solvent evaporating.~~
 - ~~_____ (4) Emulsified asphalt with solvent, containing a maximum of 15% of liquid binder by weight of VOC solvent and 46.4% by weight of the VOC solvent in the liquid blend evaporating. The percent oil distillate in emulsified asphalt with solvent liquid, as determined by ASTM, must be 7% or less of the total emulsion by volume~~
 - ~~_____ (5) Other asphalt with solvent binder, containing a maximum 25.9% of the liquid binder of VOC solvent and 2.5% by weight of the VOC solvent evaporating~~
- ~~_____ (c) The liquid binder used in cold mix asphalt production shall be limited as follows:~~
 - ~~_____ (1) Cutback asphalt rapid cure liquid binder usage shall not exceed 97.9 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.~~
 - ~~_____ (2) Cutback asphalt medium cure liquid binder usage shall not exceed 133.1 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.~~
 - ~~_____ (3) Cutback asphalt slow cure liquid binder usage shall not exceed 372.0 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.~~

- (4) ~~Emulsified asphalt with solvent liquid binder usage shall not exceed 199.7 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.~~
- (5) ~~Other asphalt with solvent liquid binder shall not exceed 3720.2 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.~~
- (6) ~~The VOC solvent allotments in subpart (c)(1) through (c)(5) of this condition shall be adjusted when more than one type of binder is used per twelve (12) month consecutive period rolled on a monthly basis. In order to determine the tons of VOC emitted per each type of binder, use the following formula and divide the tons of VOC solvent used for each type of binder by the corresponding adjustment ratio listed in the table that follows:~~

$$\frac{\text{Tons of solvent contained in binder}}{\text{Adjustment ratio}} = \text{tons of VOC emitted}$$

Type of Binder	Tons VOC Solvent	Adjustment Ratio	Tons VOC Emitted
Cutback Asphalt Rapid Cure		4	
Cutback Asphalt Medium Cure		1.36	
Cutback Asphalt Slow Cure		3.8	
Emulsified Asphalt		2.04	
Other Asphalt		38	

- ~~The equivalent total tons of VOC of the combined liquid binders shall be less than ninety-seven and nine tenths (97.9) tons per twelve (12) consecutive month period rolled on a monthly basis. Compliance with this limit will ensure that 326 IAC 2-7 and 326 IAC 2-2 does not apply.~~

D.1.10 Record Keeping Requirements

- (a) To document compliance with Condition D.1.2, the Permittee shall maintain records in accordance with (1) through (3) below. Records maintained for (1) through (3) shall be taken as stated below and shall be complete and sufficient to establish compliance with the PM-10 emission limits established in Condition D.1.2.
- (1) A log of the dates of operation;
 - (2) The total amount of asphalt produced each month; and
 - (3) The amount of natural gas used each month.
- (b) ~~To document compliance with Condition D.1.4 Volatile Organic Compounds, VOC records shall document VOC usage as follows:~~
- (1) ~~Amount and type of liquid binder used in the production of cold mix asphalt each~~

~~day.~~

- ~~_____ (2) Type and VOC, solvent content by weight of the liquid binder used in the production of cold mix asphalt each day.~~
- ~~_____ (3) Amount of VOC, solvent used in the production of cold mix asphalt each day.~~
- ~~_____ Records may include: delivery tickets, manufacturer's data, material safety data sheets (MSDS), and other documents necessary to verify the type and amount used. Test results of ASTM tests for asphalt cutback and asphalt emulsion may be used to document volatilization.~~
- (e) (b) To document compliance with Condition D.1.7, the Permittee shall maintain records of the total static pressure drop across the baghouse used in conjunction with the dryer burner, at least once per shift when the dryer burner is in operation when venting to the atmosphere.
- (d) (c) To document compliance with Condition D.1.8, the Permittee shall maintain quarterly records of the inspections performed on all bags controlling the dryer burner when venting to the atmosphere.
- (e) (d) To document compliance with Condition D.1.10, the Permittee shall maintain records of visible emission notations of the stack exhaust once per shift.
- (f) (e) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.1.11 Reporting Requirements

A quarterly summary of the information to document compliance with Conditions D.1.2 and D.1.4 shall be submitted to the addresses listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

**Indiana Department of Environmental Management
Office of Air Quality
and
City of Indianapolis
Office of Environmental Services**

**Technical Support Document (TSD) for a Federally Enforceable State
Operating Permit (FESOP) Renewal**

Source Background and Description

Source Name:	F.E. Harding Asphalt Co., Inc.
Source Location:	5145 East 96 th Street, Indianapolis, IN, 46240
County:	Marion
SIC Code:	2951
Operation Permit No.:	097-14085-00082
Permit Reviewer:	N. Olsen

The Office of Air Quality (OAQ) and the City of Indianapolis Office of Environmental Services (OES) have reviewed a FESOP renewal application from F.E. Harding Asphalt Co., Inc. relating to the operation of a hot mix batch asphalt plant. F.E. Harding was issued FESOP 097-5482-00082 on January 21, 1997.

Permitted Emission Units and Pollution Control Equipment

The source consists of the following permitted emission units and pollution control devices:

- (a) One (1) Asphalt Mixer (unit ID 1), 180 tons per hour maximum rated capacity, equipped with one (1) 80 million Btu per hour dryer burner (unit ID 2). The dryer burner will only combust natural gas. Particulate emissions are controlled by one (1) baghouse, blower rated at 46,000 cfm. The asphalt mixer was installed in 1969. The dryer burner was installed in 1989.

Unpermitted Emission Units and Pollution Control Equipment

There are no unpermitted facilities operating at this source during this review process.

Insignificant Activities

The source also consists of the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (a) Two (2) 22,000 gallon VOL Storage Tanks, maximum true vapor pressure less than 15.0 kPa. These tanks were installed in 1969;
- (b) One (1) Hot Oil Heater, 1.3 million Btu per hour maximum rated capacity. The Hot Oil Heater will only combust natural gas;
- (c) Petroleum fuel (excluding gasoline) dispensing facilities having storage capacities less than or equal to 10,500 gallons and dispensing less than or equal to 230,000 gallons per month;
- (d) Closed loop heating and cooling systems; and

- (e) Three (3) hot asphalt mix storage silos: 170 tons, 190 tons, and 200 tons capacity.
- (f) Vessels storing lubricating oils, hydraulic oils, machining oils, and machining fluids;
- (g) Vehicle travel on paved roads, unpaved roads, and parking lots;
- (h) Aggregate stockpiles;
- (i) Conveying, transferring, and transportation of aggregates by vehicles;
- (j) Loading and unloading of material.

Existing Approvals

- (a) FESOP 097-5482-00082, issued on January 21, 1997; and expiring on January 21, 2002.

All conditions from the previous approval were incorporated into this FESOP except the following:

- (1) Condition D.1.6: Periodic Emissions Testing

That the Permittee shall perform particulate emissions testing on the drum mixer/dryer and burner every 5 years in accordance with IDEM requirements. Stack test methods are described in Condition D.1.3 of this permit.

Reason not incorporated: In the original FESOP permit, there were two conditions on stack testing (D.1.3 Performance Testing and D.1.6 Periodic Emissions Testing). It is not necessary to carry both conditions over to this Renewal. Condition D.1.6 Periodic Emissions Testing is being removed. The new stack testing condition will contain language regarding the frequency of compliance testing.

- (2) Condition D.1.7: Quarterly Reporting

There are no reporting requirements for the facility.

Reason not incorporated: This condition is being removed because there are reporting requirements for this source. There should have been quarterly reporting required in the original FESOP because the source was limiting PM-10 such that an applicable requirement (326 IAC 2-7) would not apply. The source will continue to limit potential to emit PM-10 to less than one hundred (100) tons per year, such that the Part 70 rules (326 IAC 2-7) shall not apply. This Renewal contains a condition (Condition D.1.11 Reporting Requirements) which requires the source to submit a quarterly summary to document compliance with PM-10 limitations.

The following changes were incorporated into this FESOP:

- (a) Corrections in applicability:

- (1) In the previous FESOP, it was stated that this source was subject to the New Source Performance Standards (NSPS), 40 CFR Part 60.90, Subpart I (326 IAC 12) which limits particulate emissions to 0.04 grains per dry standard cubic feet (gr/dscf) and visible emissions to 20% opacity. However, this asphalt plant was manufactured in 1969 and precedes the applicability date (June 11, 1973) of 40 CFR Part 60.90, Subpart I (326 IAC 12). The modification that occurred in 1989 which replaced a 100 mmBtu/hr dryer burner with an 80 mmBtu/hr dryer burner did not result in an increase in the emission rate to the atmosphere of a pollutant for which the standard applies, thus does not trigger the applicability of 40 CFR Part 60.90, Subpart I (326 IAC 12). Therefore, 40 CFR Part 60.90, Subpart I (326 IAC 12) does not apply.

- (2) Particulate emissions were further limited to 0.03 gr/dscf because this source was thought to be subject to 326 IAC 6-1-2 (a). However, 326 IAC 6-1-2 (a) applies to asphalt concrete plants if constructed after June 11, 1973, but the construction date of this asphalt mixer is 1969. Because the source existed prior to June 11, 1973, it is subject to 326 IAC 6-1-2(c)(1) which limits particulate to 0.10 gr/dscf. Visible emissions are subject to 326 IAC 5-1 which limits the source to 30% opacity.
- (b) Due to the change in applicability from 326 IAC 6-1-2 (a) to 326 IAC 6-1-2 (c), and removal of the applicability of 40 CFR Part 60.90, Subpart I, the particulate limitation has changed from 0.03 gr/dscf to 0.10 gr/dscf. This change has increased the limited potential to emit PM and PM-10. The 0.03 gr/dscf grain limitation in the previous FESOP assured compliance with 326 IAC 2-8-4. However, the new grain limitation by itself does not restrict PM-10 emissions to below one hundred (100) tons per year. In order to remain a FESOP, a federally enforceable restriction on the hours of operation and asphalt production were incorporated into this permit. The source is limited to 5,852 hours of operation per year and 1,053,438 tons of asphalt per year.
- (c) The unrestricted potential to emit (PTE) for the source is based on the emission units included in the original FESOP and any additional emission units or processes that have been added since the issuance of the permit. Although the source has not constructed any new emission units, the process of cutback coldmix asphalt production was not included in the original calculations. Because the source has the capability to produce cutback cold mix asphalt, the inclusion of emissions that would result from the maximum potential production of cold mix cutback asphalt by the source has been added to this Renewal. The addition of this process has increased the PTE of VOC.

Emission Calculations

Emission calculations for this source can be found in Appendix A, pages 1 through 8 of 8.

Recommendation

The staff recommends to the Administrator that the FESOP Renewal be approved. This recommendation is based on the following facts and conditions:

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant.

An administratively complete FESOP Renewal application for the purposes of this review was received on March 9, 2001.

Unrestricted Potential Emissions

This table reflects the unrestricted potential emissions of the source, excluding the emission limits that were contained in the previous FESOP.

Pollutant	Unrestricted Potential Emissions (tons/yr)
PM	25,282
PM-10	3,572
SO ₂	0.2
VOC	>250*
CO	12.4
NO _x	49.7

Note: For the purpose of determining Title V applicability for particulates, PM-10, not PM, is the regulated pollutant in consideration.

*The VOC potential emissions include the maximum potential use of cold mix cutback asphalt.

HAP's	Unrestricted Potential Emissions (tons/yr)
Single HAP	4.6
Combined HAPs	4.6

- (a) The potential to emit (as defined in 326 IAC 2-1.1-1(16)) of PM-10 is equal to or greater than 100 tons per year. Therefore, the source is subject to the provisions of 326 IAC 2-7.
- (b) Fugitive Emissions
 Since this type of operation is one of listed source categories under 326 IAC 2-2-1(w)(2) and since there are applicable New Source Performance Standards that were in effect on August 7, 1980, the fugitive emissions are counted toward determination of PSD and Emission Offset applicability.

Potential to Emit After Issuance

The source, issued a FESOP on January 21, 1997, has opted to remain a FESOP source, rather than apply for a Part 70 Operating Permit. The table below summarizes the potential to emit, reflecting all limits, of the emission units. Any control equipment is considered enforceable only after issuance of this Federally Enforceable State Operating Permit and only to the extent that the effect of the control equipment is made practically enforceable in the permit. The source's potential to emit is based on the emission units included in the original FESOP (F097-5482-00082; issued on January 21, 1997). Although the source has not constructed any new emission units, the potential to emit PM, PM-10, and VOC has increased. The increase in PTE of particulate is due to change in grain limitation from 0.03 gr/dscf to 0.10 gr/dscf. The PTE of VOC has changed because the previous FESOP did not include the process of cold mix cutback asphalt production in the calculation of unrestricted potential emissions. The inclusion of emissions that would result from the maximum potential production of cold mix cutback asphalt by the source has been added to this Renewal.

	Potential to Emit After Issuance (tons/year)						
Process/emission unit	PM	PM-10	SO ₂	VOC	CO	NO _x	HAPs
Aggregate Dryer Mixer	85.8	85.8	0.0	0.0	0.0	0.0	0.0
Aggregate Dryer Burner	2.2	1.1	0.2	1.0	12.3	49.1	4.6
Combined Fugitive Dust	26.5	12.0	0.0	0.0	0.0	0.0	0.0
Cutback Asphalt	0.0	0.0	0.0	97.9	0.0	0.0	0.0
Insignificant Activities	0.1	0.1	0.0	0.1	0.1	0.6	0.0
Total PTE After Issuance	114.6	99.0	0.2	99.0	12.4	49.7	4.6

County Attainment Status

The source is located in Marion County.

Pollutant	Status
PM-10	attainment
SO ₂	maintenance
NO ₂	attainment
Ozone	maintenance
CO	attainment
Lead	unclassifiable

Federal Rule Applicability

- (a) The hot mix asphalt plant is not subject to the New Source Performance Standard (NSPS), 40 CFR Part 60.90, Subpart I (326 IAC 12). This asphalt plant was manufactured in 1969 and therefore precedes the applicability date of June 11, 1973. The modification that occurred in 1989 which replaced a 100 mmBtu/hr dryer burner with an 80 mmBtu/hr dryer burner did not result in an increase in the emission rate to the atmosphere of a pollutant for which the standard applies, thus does not trigger the applicability of 40 CFR Part 60.90, Subpart I (326 IAC 12).
- (b) The two (2) 22,000 gallon storage vessels are not subject to the NSPS, 40 CFR Part 60.110b through 60.117b, Subpart Kb (326 IAC 12) because these storage vessels were installed in 1969 which precedes the applicability date of the rule (July 23, 1984).
- (c) There are no National Emission Standards for Hazardous Air Pollutants (NESHAPs)(326 IAC 14 and 40 CFR Part 63) applicable to this source.

State Rule Applicability - Entire Source

326 IAC 1-5-2 (Emergency Reduction Plan)

The source has submitted an Emergency Reduction Plan (ERP) on September 20, 1988. The ERP has been verified to fulfill the requirements of 326 IAC 1-5-2 (Emergency Reduction Plan).

326 IAC 1-6-3 (Preventative Maintenance Plan)

Pursuant to 326 IAC 2-8-4(9), the source is required to maintain a Preventative Maintenance Plan (PMP) on site. Pursuant to 326 IAC 2-8-3(c)(6)(FESOP: Permit Application), the source is not required to submit the plan. However, the PMP maintained on site must meet the requirements of 326 IAC 1-6-3 (Preventive Maintenance Plan). The previous FESOP issued to this source, F097-5482-00082, had the requirement included in Condition B.13 and is being carried over to this renewal.

326 IAC 2-2-2 (Prevention of Significant Deterioration)

The source is not subject to this rule because construction commenced in 1969 which precedes the applicability date of 326 IAC 2-2 (August 7, 1977). Therefore, the source is major, but preexists this rule. The modification that occurred in 1989 which replaced a 100 mmBtu/hr dryer burner with an 80 mmBtu/hr dryer burner did not increase the potential to emit for the source, thus does not trigger the applicability of 326 IAC 2-2 (PSD).

326 IAC 2-4.1 (Hazardous Air Pollutants)

The source is not subject to 326 IAC 2-4.1 because the plant was manufactured in 1969 which is prior to the applicability date of the rule (July 27, 1997) and the source is not a major source of hazardous air pollutants, as defined in 40 CFR 63.

326 IAC 2-6 (Emission Reporting)

This source is subject to 326 IAC 2-6 (Emission Reporting), because the source is located in Marion County and it has the potential to emit more than ten (10) tons per year of NO_x. Pursuant to this rule, the owner/operator of the source must submit an emission statement for the source. The statement must be received by April 15 of each year, in accordance with the compliance schedule

specified in 326 IAC 2-6 and contain the minimum requirement as specified in 326 IAC 2-6-4. The submittal should cover the period defined in 326 IAC 2-6-2(8).

326 IAC 2-8-4 (FESOP)

- (a) Pursuant to this rule, source wide emissions of PM-10 and VOC shall be limited to less than one hundred (100) tons per year such that it does not fall within any of the categories listed in 326 IAC 2-7-2(a) and that assure compliance with all applicable requirements at the time of FESOP issuance (See Emissions Calculations, Appendix A). The following limits shall apply to assure compliance with this rule:

(1) Particulate matter less than 10 microns (PM-10)

- (A) The total asphalt production for this plant shall be limited to 1,053,438 tons per twelve (12) consecutive month period with compliance determined at the end of each month. This production limit is the equivalent of ninety-nine (99.0) tons of PM-10 source wide per twelve consecutive month period.
- (B) PM-10 emissions from combined process equipment and dryer burner operations shall be limited to two tenths (0.2) pounds per ton (lb/ton) (See calculations, Appendix A). Due to the potential to emit limitations, Part 70 rule (326 IAC 2-7) is not applicable.

(2) Volatile Organic Compounds

Pursuant to 326 IAC 2-8-4, the liquid binder used in cold mix asphalt production shall be limited as follows:

- (A) Cutback asphalt rapid cure liquid binder usage shall not exceed ninety-seven and nine tenths (97.9) tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.
- (B) Cutback asphalt medium cure liquid binder usage shall not exceed 133.1 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.
- (C) Cutback asphalt slow cure liquid binder usage shall not exceed 372.0 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.
- (D) Emulsified asphalt with solvent liquid binder usage shall not exceed 199.7 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.
- (E) Other asphalt with solvent liquid binder shall not exceed 3,720.2 tons of VOC solvent per twelve (12) consecutive month period rolled on a monthly basis.
- (F) The VOC solvent allotments in (A) through (E) above shall be adjusted when more than one type of binder is used per twelve (12) month consecutive period rolled on a monthly basis. In order to determine the tons of VOC emitted per each type of binder, use the following formula and divide the tons of VOC solvent used for each type of binder by the corresponding adjustment ratio listed in the table that follows.

$$\frac{\text{Tons of solvent contained in binder}}{\text{Adjustment ratio}} = \text{tons of VOC emitted}$$

Type of binder	Tons VOC Solvent	Adjustment Ratio	Tons VOC Emitted
Cutback Asphalt Rapid Cure		1	
Cutback Asphalt Medium Cure		1.36	
Cutback Asphalt Slow Cure		3.8	
Emulsified Asphalt		2.04	
Other Asphalt		38	

The equivalent total tons of VOC of the combined liquid binders shall be less than ninety-seven and nine tenths (97.9) tons per twelve consecutive month period rolled on a monthly basis.

- (b) The source wide unrestricted potential to emit of an individual HAP or combination of HAPs does not exceed the thresholds listed in 326 IAC 2-7-1(22), thus the source does not have major potential to emit for HAPs. Limiting source wide emissions of PM-10 will further limit the potential to emit of an individual HAP or combination of HAPs. Therefore, the source will not fall within any the categories listed in 326 IAC 2-7-2(a) and will comply with all applicable requirements at the time of the FESOP issuance (See Emissions Calculations, Appendix A).

326 IAC 5-1 (Opacity Limitations)

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), the source is subject to this rule because the source is located in Marion County, except for the area of Washington Township east of Fall Creek and the area of Franklin Township south of Thompson Road and east of Five Points Road. Thus, opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of thirty percent (30%) any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4. Compliance with 40 CFR Part 60.90, Subpart I satisfies the requirement for 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

326 IAC 6-4-1 (Fugitive Dust Emissions)

Pursuant to 326 IAC 6-4-1, the source shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

326 IAC 6-5 (Fugitive Particulate Emissions Limitations)

Pursuant to this rule, a fugitive dust control plan was submitted by the source on January 17, 1997. The plan was reviewed and approved. The source shall comply with all dust abatement measures contained therein. The plan is included as Attachment A of the permit.

State Rule Applicability - Individual Facilities

Dryer Burner

326 IAC 6-1-2 (Particulate Limitations)

The source is subject to 326 IAC 6-1-2(c)(1) because the plant was manufactured in 1969 and therefore existed prior to June 11, 1973. Pursuant to this rule, particulate matter emissions from the dryer burner shall not exceed 0.10 grains per dry standard cubic foot (gr/dcsf). This is equivalent to PM-10 emissions of twenty-nine and three tenths (29.3) pounds per hour (lb/hr). The baghouse shall be in operation at all times the dryer burner is in operation, in order to comply with this limit.

326 IAC 7-1.1-2 (Sulfur Dioxide Emissions Limitations)

The source is not subject to 326 IAC 7-1.1 (Sulfur Dioxide Emissions Limitations) because the source does not have the potential to emit twenty-five (25) tons per year or ten (10) pounds per hour of sulfur dioxide.

Miscellaneous Operations

326 IAC 8-5-2 (Miscellaneous Operations: Asphalt Paving)

Pursuant to 326 IAC 8-5-2, no person shall cause or allow the use of cutback asphalt or asphalt emulsion containing more than seven (7) percent oil distillate by volume of emulsion of any paving application except:

- (a) Penetrating prime coating;
- (b) Stockpile storage; and
- (c) Application during the months of November, December, January, February, and March.

Insignificant Activities

326 IAC 8-9 (Volatile Organic Liquid Storage Vessels)

The source is not subject to 326 IAC 8-9 (Volatile Organic Liquid Storage Vessels) because the source is not located in Clark, Floyd, Lake, or Porter County.

Testing Requirements

326 IAC 2-8-4(3) (Performance Testing)

This Permittee completed stack testing on this facility in May 2000. Therefore, the Permittee shall not be required to stack test until May 2005. Upon this date, the permittee shall perform a stack test approved by OES and IDEM/OAQ to demonstrate compliance with 326 IAC 6-1-2, 326 IAC 2-2-2, and 326 IAC 2-8-4. Stack tests shall include testing for PM and PM-10 (filterable and condensable). The stack test methods shall be in accordance with the provisions of 326 IAC 3-2-1 (Source Sampling Procedures).

In order to demonstrate compliance with 326 IAC 2-8-4, PM-10 emissions from combined process equipment and dryer/burner operations are limited to 8.8 pounds per hour (lb/hr). The total asphalt production for this plant is limited to 400,002 tons per twelve (12) consecutive month period. This production limit is the equivalent of 28.2 tons of PM-10 source wide per year.

Previous stack tests to comply with this requirement were conducted for PM-10 on May 16, 2000. PM-10 emissions (particulate) were found to be 0.010 gr/dscf. In order to demonstrate compliance with 326 IAC 6-1-2, allowable PM emissions are limited to less than 0.10 gr/dscf. In order to demonstrate compliance with 326 IAC 5-1, visible emissions are limited to 30% opacity.

Compliance Requirements

Permits issued under 326 IAC 2-8 are required to ensure that sources can demonstrate compliance with applicable state and federal rules on a more or less continuous basis. All state and federal rules contain compliance provisions, however, these provisions do not always fulfill the requirement for a more or less continuous demonstration. When this occurs IDEM, OAQ, in conjunction with the source, must develop specific conditions to satisfy 326 IAC 2-8-4. As a result, compliance requirements are divided into two sections: Compliance Determination Requirements and Compliance Monitoring Requirements.

Compliance Determination Requirements in Section D of the permit are those conditions that are found more or less directly within state and federal rules and the violation of which serves as grounds for enforcement action. If these conditions are not sufficient to demonstrate continuous compliance, they will be supplemented with Compliance Monitoring Requirements, also Section D of the permit. Unlike Compliance Determination Requirements, failure to meet Compliance Monitoring conditions would serve as a trigger for corrective actions and not grounds for enforcement action. However, a violation in relation to a compliance monitoring condition will arise through a source's failure to take the appropriate corrective actions within a specific time period.

All compliance requirements from previous approvals were incorporated into this FESOP. The compliance monitoring requirements applicable to this source are as follows:

- (1) The baghouse has applicable compliance monitoring conditions as specified below:
 - (a) Visible emissions notations of the exhaust stack from the baghouse, conveyors, and transfer points shall be performed once per shift during normal daylight operations. A trained employee will record whether emissions are normal or abnormal. For processes operated continuously "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time. In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions. A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed.
 - (b) The Permittee shall record the total static pressure drop across the baghouse controlling the dryer burner, at least once per shift when the dryer burner is in operation. Unless operated under conditions for which the Compliance Response Plan specifies otherwise, the pressure drop across the baghouse shall be maintained within the range of 2.0 to 8.0 inches of water or a range established during the latest stack test. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when the pressure reading is outside of the above mentioned range for any one reading.
 - (c) An inspection shall be performed each calendar quarter of all bags controlling the dryer burner when venting to the atmosphere. A baghouse inspection shall be performed within three months of redirecting vents to the atmosphere and every three months thereafter. Inspections are optional when venting to the indoors. All defective bags shall be replaced.
 - (d) In the event that bag failure has been detected:
 - (1) For multi-compartment units, the affected compartments will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if there are no visible emissions or if the event qualifies as an emergency and the Permittee satisfies the emergency provisions of this permit (Section B- Emergency Provisions). Within eight (8) business hours of the determination of failure, response steps according to the timetable described in the Compliance Response Plan shall be initiated. For any failure with corresponding response steps and timetable not described in the Compliance Response Plan, response steps shall be devised within eight (8) business hours of discovery of the failure and shall include a timetable for completion. Failure to take response steps in accordance with Section C - Compliance Response Plan-Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit.
 - (2) For single compartment baghouses, failed units and the associated process will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

These monitoring conditions are necessary because the baghouse controlling the aggregate drying and mixing process must operate properly to ensure compliance with 40 CFR 60.90, Subpart I, 326 IAC 2-8 (FESOP), and 326 IAC 6-1-2, and avoid becoming a major PSD source under 326 IAC 2-2.

Conclusion

The operation of this hot drum-mix asphalt plant shall be subject to the conditions of the attached proposed FESOP No.: F097-14085-00082.

APPENDIX A

ATTACHMENT A

ASPHALT PLANT SITE FUGITIVE DUST CONTROL PLAN

Source Name: F.E. Harding Asphalt Co., Inc.
Source Address: 5145 East 96th St., Indianapolis, IN 46240
Mailing Address: 10151 Hague Road, Indianapolis, Indiana, 46256
FESOP No.: F097-14085-00082

This form consists of 2 pages

Page 1 of 2

1. Fugitive particulate matter (dust) emissions from paved roads, unpaved roads, and parking lots shall be controlled by one or more of the following measures:
 - A. Paved roads and parking lots:
 - a. Cleaning by vacuum sweeping on an as needed basis (monthly at a minimum).
 - b. Flushing.
 - c. An equivalent alternate measure.
 - B. Unpaved roads and parking lots:
 - a. Paving with asphalt or concrete.
 - b. Treating with a suitable and effective oil or chemical dust suppressant on an as needed basis.
 - c. Spraying with water on an as needed basis.
 - d. Double chip and seal the road surface and maintain on an as needed basis.
 - e. An equivalent alternate measure.
2. Fugitive particulate matter (dust) emissions from aggregate stockpiles shall be controlled by one or more of the following measures.
 - A. Cleaning around the perimeter of aggregate piles.
 - B. Application of a suitable and effective oil or other dust suppressant on an as needed basis.
 - C. An equivalent alternate measure.
3. Fugitive particulate matter (dust) emission from outdoor conveying of aggregates shall be controlled by one or more of the following measure:
 - A. Enclose the conveyor belt totally on the top and sides as needed to minimize visible emissions. If needed, exhaust emissions to particulate control equipment during operation of conveyor.

- B. Apply water or suitable and effective chemical dust suppressant at the feed and the intermediate points on an as needed basis to minimize visible emissions.
 - C. An equivalent alternate measure.
4. Fugitive particulate matter (dust) emissions resulting from the transferring of aggregates shall be controlled by one or more of the following measures:
- A. Minimize the vehicular distance between the transfer points.
 - B. Enclose the transfer points, and if needed, exhaust to particulate control equipment during operation of the transferring system.
 - C. Apply water or suitable and effective chemical dust suppressant on transfer points on an as needed basis.
 - D. An equivalent alternate measure.
5. Fugitive particulate matter (dust) emissions resulting from transportation of aggregate by truck, front end loader, etc. shall be controlled by one or more of the following measures:
- A. Use of completely enclosed vehicles.
 - B. Tarping the aggregate hauling vehicles.
 - C. Maintain vehicle bodies in a condition to prevent leakage of aggregate material.
 - D. Spray the aggregates with water or a suitable and effective chemical dust suppressant.
 - E. An equivalent alternate measure.
6. Fugitive particulate matter (dust) emissions resulting from the loading and unloading of materials shall be controlled by one or more of the following measures:
- A. Enclosure of the material loading/unloading area.
 - B. Spraying with water or suitable and effective chemical dust suppressant as needed to minimize visible emissions.
 - C. Reduction of free fall distance to a minimum.
 - D. Reduce the rate of discharge of the aggregate.
 - E. An equivalent alternate measure.

“An As Needed Basis” means the frequency or quantity of application necessary to minimize visible particulate matter emissions.

Unlimited and Limited Potential to Emit from Combustion

SAMPLE CALCULATION	MMCF	X	LB	X	TONS	=	TONS
	YR		MMCF		LB		YR

Note: Potential to Emit SO2 is greater than 25 tpy or 10 lb/hr. Therefore, facility is limited to 0.5 lb SO2 / MMBtu for distillate oil combustion (No. 2 oil, No. 4 oil, and No. 4 waste oil).

Source	Fuel Source	Consumption Units	SCC ID Code	mmBtu/hr Rating	Hours of Operation	Annual Fuel Consumption	LIMITED POTENTIAL TO EMIT											
							PM10		PM		SO2		NOX		VOC		CO	
							(lb/hr)	(Ton/Yr)	(lb/hr)	(Ton/Yr)	(lb/hr)	(Ton/Yr)	(lb/hr)	(Ton/Yr)	(lb/hr)	(Ton/Yr)	(lb/hr)	(Ton/Yr)
Aggreg. Dryer	Nat gas	MMCF	10200601	80.0	8760.0	700.8	0.24	1.05	0.50	2.17	0.05	0.21	11.20	49.06	0.22	0.98	2.80	12.26
Hot oil heater	Nat gas	MMCF	10200601	1.30	8760.0	11.4	0.00	0.02	0.00	0.02	0.00	0.00	0.13	0.57	0.01	0.03	0.03	0.11

Limited hours of operation = kGal oil * 1000 * (0.14 MMBtu/Gal) / (MMBtu/hr) = (Limited fuel consumption) * (MMBtu/Unit) / (MMBtu/hr)

% sulfur in distillate oil = (0.5 lb SO2/MMBtu) * (1 lb S/2 lb SO2) * (0.14 MMBtu/gal) * 100 = 0.486%

Unlimited Potential to Emit PM10 from Vehicle Travel on Unpaved Roads

Company Name: F.E. Harding Asphalt Co., Inc.
Street Address: 5145 East 96th St., Indianapolis, IN, 46240
County: Marion County
Operation Permit No.: 097-14085-00082
Reviewer: N. Olsen

$$E = \frac{k * s * S * W^{0.7} * w^{0.5} (365-p)}{(263.309) (365)} = \text{lb particulate/vehicle mile traveled on unpaved roads (AP-42, 13.2.2)}$$

k = 0.36 particle size multiplier for PM10 (constant)
 s = 4.8 silt content of road surface material (%), unspecified municipal roads
 p = 120 number of days with at least 0.01 inch of precipitation (per year)

S = mean vehicle speed (mph)

W = mean vehicle weight (tons)

w = number of wheels

Vehicle Type	Mean Speed (mph)	Mean Weight (tons)	# of Wheels	Trip (mi) Distance	# Trips per Hour	Total Miles (One Day)	Day/Year	E (lb/VMT)	PM10 (ton/yr)
Triaxle dump truck	10	22.25	14	0.125	16	48.00	365	1.45	12.67
Front end loader	10	34.8	4	0.125	16	48.00	365	1.06	9.26
(one way)								Total fugitive PM10 emissions =	21.93
								Fugitive PM10 emission control	50.00%
								Total fugitive PM10 emissions =	10.96

Example

$$E = \frac{(0.36 * 6 * 10 * 40^{0.7} * 18^{0.5}) (365-120)}{(263.309) (365)} = 3.09 \text{ lb PM10/VMT}$$

Unlimited Potential to Emit PM from Vehicle Travel on Unpaved Roads

Company Name: F.E. Harding Asphalt Co., Inc.
Street Address: 5145 East 96th St., Indianapolis, IN, 46240
County: Marion County
Operation Permit No.: 097-14085-00082
Reviewer: N. Olsen

$$E = \frac{* s * S * W^{0.7} * w^{0.5} (365-p)}{(263.309) (365)} = \text{lb particulate/vehicle mile traveled on unpaved roads (AP-42, 13.2.2)}$$

k = 0.8 particle size multiplier for PM10 (constant)
 s = 4.8 silt content of road surface material (%), unspecified municipal roads
 p = 120 number of days with at least 0.01 inch of precipitation (per year)

S = mean vehicle speed (mph)

W = mean vehicle weight (tons)

w = number of wheels

Vehicle Type	Mean Speed (mph)	Mean Weight (tons)	# of Wheels	Trip (mi) Distance	# Trips per Hour	Total Miles (One Day)	Day/Year	E (lb/VMT)	PM (ton/yr)
Triaxle dump truck	10	22.25	14	0.13	16	48	365	3.21	28.15
Front end loader	10	34.8	4	0.13	16	48	365	2.35	20.58
(one way)						Total fugitive PM emissions = 48.72			
						Fugitive PM emission control = 50.00%			
						Total fugitive PM emissions = 24.36			

Example

$$E = \frac{(0.8 * 6 * 10 * 40^{0.7} * 18^{0.5}) (365-120)}{(263.309) (365)} = 6.87 \text{ lb PM}_{10}/\text{VMT}$$

front end loader: 4 cu yd/trip = 5.4 ton/trip @ 1.35 ton/cu yd

front end loader: 60 ton/hr @ 5.4 ton/trip = 11.1 round trips per hour

dump trucks: 60 ton/hr @ 18 ton/trip = 3.33 round trip per hour

Unlimited Potential to Emit from Material Handling

Company Name: F.E. Harding Asphalt Co., Inc.
Street Address: 5145 East 96th St., Indianapolis, IN, 46240
County: Marion County

AP-42 11.19.2-4: emission factors for crushed stone processing

Operation	Number of Points	Individual Rate (ton/hr)	EF: PM10 Uncontrolled (lb/ton)	EF: PM10 Controlled (lb/ton)	Uncontrolled PM10 (ton/yr)	Controlled PM10 (ton/yr)
Conveyor trans.	7	180	0.0014	0.000048	7.73	0.26
Screening	1	180	0.0150	0.000840	11.83	0.66
Front end loader	1	180	0.0014	0.000048	1.10	0.04
Total PM10					20.7	1.0

Per AP-42 11.19.2-6c: PM = PM10 x 2.1

Operation	Number of Points	Individual Rate (ton/hr)	EF: PM Uncontrolled (lb/ton)	EF: PM Controlled (lb/ton)	Uncontrolled PM (ton/yr)	Controlled PM (ton/yr)
Conveyor trans.	7	180	0.0029	0.000101	16.23	0.56
Screening	1	180	0.0315	0.001764	24.83	1.39
Front end loader	1	180	0.0029	0.000101	2.32	0.08
Total PM					43.4	2.0

PM and PM10 Emissions from Storage Piles

Company Name: F.E. Harding Asphalt Co., Inc.
Street Address: 5145 East 96th St., Indianapolis, IN, 46240
County: Marion County
Operation Permit No.: 097-14085-00082
Reviewer: N. Olsen

AP42 11.2-3.1 (1987)

s = silt content of aggregate, worst case (%) = 2.6

f = % time when wind > 12 mph at mean pile height = 15

p = no. of days/yr with > 0.01" precipitation = 125

PC = total pile capacity (acres) = 0.15

$EF \text{ [lb/day/acre]} = 1.7 * (s/1.5) * [(365-p)/235] * (f/15)$

$EF \text{ [lb/day/acre]} = 1.7 * (1.2/1.5) * [(365-125)/235] * (15/15)$

EF [lb/day/acre] = 3.009

PM emissions = PC * EF * 365 day/yr * ton/2000 lbs

PM emissions = 4.50 acres * 1.389 lb/day/acre * 365 day/yr * ton/2000 lbs

PM emissions = 0.08 tons per year

PM10 = PM / 2.1 = 0.04 tons per year

Per AP-42 11.19.2-6c: PM = PM10 * 2.1
